

STUDY MATERIAL OF CLASS 1

AI (Artificial Intelligence)

Q1: What is AI?

☞ AI is when computers learn to **think and help us**, like a robot friend.

Q2: Can AI talk to me?

☞ Yes! AI can talk, answer questions, and even tell you stories.

Q3: Can AI play games?

☞ Yes! It can play games and even learn to get better at them.

Q4: Is AI like a brain?

☞ Yes! It's like a **robot brain** that can learn things.

Q5: Can AI be in toys?

☞ Yes! Some toys can **listen, talk, and play** using AI.

Blockchain

Q1: What is blockchain?

☞ It's like a **magic notebook** where we write things that **no one can erase**.

Q2: Why do we need blockchain?

☞ To keep things **safe and secret**, like your treasures or scores.

Q3: Is blockchain a real chain?

☞ No, it's not a real chain — it's on the **computer**, but it works like a chain to **link information**.

Q4: Can blockchain help in games?

☞ Yes! It **saves your rewards** and makes sure no one can cheat.

Q5: Is blockchain safe?

☞ Super safe! Like a **locked treasure chest**.

⌘ AI + Blockchain Together

Q1: Can AI and blockchain work together?

☞ Yes! They can be **best friends** and make smart, safe things.

Q2: What can they do together?

☞ They can make **clever robots** that **keep secrets safe**.

Q3: Are they fun?

☞ Yes! They make toys, games, and apps more fun and smart.

🎮 What is an NFT?

Q1: What is an NFT?

☞ It's a **special picture or item on the computer** that only **one person** can own.

🎁 NFT Like a Toy or Sticker

Q2: Is NFT like a toy?

☞ Yes! Imagine your **favorite toy** – no one else has **your exact one**. NFT is the same, but on a **computer**.

Q3: Can I touch an NFT?

☞ No! It's on the **screen**, not in your hand — but it's **still yours!**

NFT as Art

Q4: Can an NFT be a drawing?

☞ Yes! NFT can be a **funny cat**, a **robot**, or even a **dancing banana!** 🍌 🕺

Q5: Can I make an NFT?

☞ Yes! If you draw a picture on the computer, someone can make it an **NFT just for you!**

NFT is Protected

Q6: Can someone steal my NFT?

☞ No! It has a **special lock** (blockchain) that says **YOU own it**.

Q7: Is every NFT different?

☞ Yes! Like your **name**, every NFT is **special and unique**.

NFTs in Games

Q8: Can NFTs be in games?

☞ Yes! You can have **special clothes, pets, or powers** in games that are NFTs.

Q9: What makes NFTs smart and safe?

☞ **AI** makes them smart.

☞ **Blockchain** keeps them safe.

☞ So your NFT is **smart, safe, and super cool!**

Final Answer:

Q10: Why do people love NFTs?

☞ Because NFTs are like **magic stickers** that **only you can own**, and they can be **fun, pretty, or even worth a lot!** 💎
