

STUDY MATERIAL OF CLASS 3

AI, Blockchain & NFT – Learning for Class 3

1. What is AI (Artificial Intelligence)?

? Simple Definition:

AI means making computers smart so they can think, learn, and help like humans!

Examples Kids Understand:

- Alexa or Siri talking back to you
- Games that get harder as you get better
- Face filters that add dog ears 😵

% Fun Activity:

Match the AI tool with what it does:

Al Tool	What it Does		
Alexa	Talks and plays music ♪		
DALL·E	Makes pictures from words 💯		
ChatGPT	Answers questions ⁄ 1		

2. What is Blockchain?

Simple Definition:

Blockchain is like a magic notebook where we write information that nobody can erase or change!

Ⅲ Think of it like this:

- Each page = 1 block
- Pages are numbered and linked 👄
- Once you write something, it's permanent (like using a pen \mathscr{P})

Real Life Use:

- Keeping your game rewards safe
- Saving your school certificate online
- Making sure no one cheats

% Fun Fill-in-the-Blank:

1.	Blockchain is like a notebook. (magic/drawing)
2.	Once you write on blockchain, you erase it. (can/can't)
3.	It helps keep data (safe/messy)

☎ 3. What is an NFT (Non-Fungible Token)?

Simple Definition:

An NFT is a special digital item like a drawing, music, or game card that only YOU can own!

Examples for Kids:

- A **Pokemon card online** that's just yours
- A drawing you made on computer
- A cool outfit or skin in your game

Fun Fact:

NFTs can be traded, gifted, or used to join clubs and get rewards!

% Match the Meaning:

Word	Meaning		
NFT	One-of-a-kind online item		
Blockchain	Digital notebook		
Al	Smart machine that can learn		

♦ 4. What Happens When They Work Together?

Tech	What It Does			
Al	Learns and talks like humans			
Blockchain	Keeps data locked and safe			
NFT	Gives you special things that are yours			

[→] Example: In a game, AI talks to you, blockchain keeps your score safe, and your favorite pet becomes your NFT!

AI, Blockchain & NFT - Class 3 Worksheet

Name:	Class: 3	Date:	

⊘ Part A: Yes / No Questions

Circle Yes or No

- AI means making computers smart.
 Blockchain is a toy used in games.
 Yes / No
 Yes / No
- 3. NFTs can be copied and stolen easily. Yes / No
- 4. Blockchain keeps data safe and unchangeable. Yes / No
- 5. An NFT can be a picture or song that is only yours. Yes / No

- Part B: Fill in the Blanks

Choose the correct word from the box:

(AI	Blockchain	NFT	Safe	Smart)
6.	is a si	mart brain	for comp	uters.
7.	Blockchain keep	os informa	tion	and locked.
8.	A drawing or so	ng online	that only	one person owns is called an
9.	AI makes comp	uters act li	ke they a	re
10.	is like	e a magic	notebook	that no one can erase.

∞ Part C: Match the Following

Draw a line to match the left side to the right side

А	В	
11. AI	A. Special digital item you can own	
12. Blockchain B. Makes machines learn and think		
13. NFT	C. Keeps data safe and unchangeable	
14. ChatGPT D. Talks and answers questions		
15. Face Filters	E. Al used in camera apps	

3rd Class Study Material (CoreDaoVip Global Curriculum)

≪ Answer Key

✓ Part A: Yes / No

- 1. **Yes**
- 2. **No**
- 3. **No**
- 4. **Yes**
- 5. Yes

✓ Part B: Fill in the Blanks

- 6. **AI**
- 7. Safe
- 8. **NFT**
- 9. Smart
- 10. Blockchain

✓ Part C: Match the Following

- 11. AI \rightarrow **B**
- 12. Blockchain \rightarrow **C**
- 13. NFT \rightarrow **A**
- 14. ChatGPT \rightarrow **D**
- 15. Face Filters \rightarrow **E**
